

## INSAIT JOY Club

**INSAIT JOY Club portal** is another trainer and manager solution for smart football. It's a web portal that you can manage your players and create online sessions, allowing players to join online sessions and train at home with their own smart ball and INSAIT JOY app.

You can access the INSAIT JOY Club portal here: <https://joyclub-eu.gengree.com/#/login>

INSAIT JOY Club portal is also accessed via accounts (license) we provide. See below a test account for you to try out the functions:

- *username: xxxx1*
- *password: yyyy1*

Once login you will be able to find an invitation code for your club (in this test account, 3050). Players can join the club by entering the invitation code in "My Club".

Then you can create groups in the Club portal to manage your players. Pick your own group names for them - use them as labels to manage your players.

Afterwards, you will be able to set up online sessions. Pick football or shin guards in the club portal, then "Add" a new Event by setting up time, drills (for smart football) and who will be participating. Chosen players can join the session from the Event function in the INSAIT JOY app. They will be able to submit their results during the time you set up. You will be able to follow up their results and data from the club portal.

For shin guards you can also export session reports in xls format.
