

INSAIT JOY Coach App

The first trainer solution for the smart football is called **INSAIT Coach**. It is a mobile app on iPad. You may search INSAIT Coach on App Store in your iPad and download the football version app.

INSAIT Coach is accessed via accounts (license) we provide. See below a test account for you to try out the functions:

- *username: xxxx1*
- *password: yyyy1*

Before start any session you may first need to create a team and players from the link: <https://coach-eu.gengee.com/football/#/login>

Once login with the account we provided, you can create your teams and players by following the on-screen instructions.

Then you can login to the INSAIT Coach app and start a session. You can pick a drill and players for the session. Then turn on a few smart balls and Bluetooth of iPad. The iPad will be able to connect to maximum 8 balls at a time, meaning you can test 8 players with 8 smart balls at the same time, then pick another 8 players for the tests. Once all tests are done, you can end the session and view a report on that.

INSAIT Coach does not work with the smart shin guards.
